

My own assessment marking

Flowchart 20/20

My flowchart is easy to understand and follow when writing a code. It has all the steps and equations to understand the formulas used in calculations.

Working code 40/40

My code runs in all 3 scenarios. The input matches the scenarios. Output matches the scenario. Correct use of if/ elif /else statements.

Style 20/20

Good variable names easy to understand. My code consist of comments explaining clearly the information given below them. Indentation is consistent.
